Juan Sebastian Perea

Cali, Colombia · linkedin.com/in/juanseperea · +57 318 585 4309 · jspbescos15@gmail.com · github.com/Juanse1595

AI driven Fullstack developer with 4+ years of experience building scalable web applications and automation solutions. Worked at startups like Aestro, a legal tech company automating processes and communications with LLMs at the core. Built apps in TypeScript, React, Angular, Node.js (Express), Python, .NET/C#, MySQL/PostgreSQL and others, using Claude Code as my main AI tool. AWS Certified Cloud Practitioner, with hands-on experience in Google Cloud Platform (GCP) and Azure, and CI/CD automation using GitHub Actions.

PROFESSIONAL EXPERIENCE

MINDCLOUD **Remote (US)**
Systems Integrator *February 2026 – April 2026 (left to pursue full time training at Jala University)*

- Built and deployed integrations connecting SaaS platforms (Shopify, NetSuite, Amazon) using MindCloud's iPaaS platform, automating data flow and eliminating manual processes for enterprise clients
- Developed JavaScript-based data mappings and API connections to sync data across CRM, ERP, eCommerce, and financial systems, improving operational efficiency for B2B clients
- Decomposed complex integration challenges into simple, maintainable solutions by rapidly assessing technical requirements and translating them into working implementations.

AESTRO COLOMBIA AI SAS **Remote (Colombia)**
FullStack Development JS/Node *November 2023–January 2026*

- Backend Development: Used Express and TypeORM to securely expose data from a MySQL database. Designed and implemented the multi-tenant structure for the DB, maintained the structure update with migrations, built logic for switching DBs based on user identity and helped build complex relationships within the database, resulting in more than 15 fintech/legal clients on the app. Also implemented multiple integrations with several services like Sendgrid for email automation, PDF generation, CSV uploading, and other services that automate processes and make work easier for the team of 5 lawyers, roughly halving the time spent on recurring document and email tasks.
- Frontend Development: Built intuitive and easy-to-use interfaces for attorney users to improve workflow efficiency, given access to critical data and features within seconds. Technologies included React, TypeScript, Tailwind, Axios, and React Context/Redux.
- Deployment and Infrastructure: Management of server deployments with GCP, Nginx/Apache, PM2, and secure connections using Certbot for HTTPS. Package management with npm and pnpm.
- Collaboration and Communication: Worked with SCRUM methodologies, including daily standups and sprint planning. Collaborative work through Git/GitHub, performing PRs and code reviews. Interacted directly with key users to understand and fulfill specific requests.

Coderise **Cali, Colombia**
FullStack Development JS/Node *May 2022–November 2023*

- Worked as a Fullstack developer, automating business processes through web applications with React, TypeScript and other technologies, working on both frontend and backend to address key requirements. Also deployed servers with Nginx and PM2, collaborating as a team with Git/GitHub.
- Also worked as mentor at the Holberton School by Coderise bootcamp, supporting over 80 students in programming, algorithms and software architecture, and working with international teams on technical solutions.

PROJECTS

QuizArena — AI powered educational platform **Remote**
Fullstack Developer · Capstone MVP, Jala University *April 2026 – August 2026*

- Built QuizArena end to end with an Angular 22 frontend and a .NET/C# backend over PostgreSQL, structured as a Modular Monolith following DDD and Clean/Hexagonal architecture.
- Implemented the Proof of Concept for the LLM-powered quiz generation feature using Ollama to run models locally, turning it into the differentiating feature of the product.
- Designed asynchronous communication between modules with RabbitMQ and MassTransit, applying the Saga pattern to coordinate multi-step flows across module boundaries.
- Containerized the application with Docker and deployed it on Azure; collaborated through Git and designed the interface in Figma.

LitisApp — legal advice platform **Remote**
Fullstack Developer · Freelance *Dec 2024 – Feb 2025*

- Integrated the PayU payment service into the platform, using Next.js, NestJS, Supabase as the database and Apollo GraphQL for data exposure.
- Contributed to the design and development of the product landing page.

US Lawyer client — attorney website **Remote**
Fullstack Developer · Freelance *Nov 2022 – Jun 2023*

- Developed and delivered a website for a lawyer based in the USA, including a basic Stripe integration to receive payments online. Hosted website in Hostinger

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C#, SQL
Backend: Node.js (Express, NestJS), .NET / ASP.NET Core, TypeORM, REST APIs, GraphQL, RabbitMQ / MassTransit
Frontend: React, Angular, Next.js, Tailwind CSS, Redux / React Context
Databases: MySQL, PostgreSQL, MongoDB, Supabase
Cloud & DevOps: AWS Cloud Practitioner, GCP, Azure, Docker, GitHub Actions (CI/CD), Nginx/Apache, PM2, Certbot, Git/GitHub.
Practices & AI: DDD, Clean/Hexagonal architecture, Modular Monolith, Saga pattern, SCRUM, LLM integration (Ollama, Claude Code)

EDUCATION & CERTIFICATIONS

AWS CLOUD PRACTITIONER CERTIFICATION **Certificate**
Oct 2026
Foundational certification covering AWS cloud concepts, architecture, security and compliance, and billing and pricing. Hands-on knowledge of core services, including Amazon EC2, S3, RDS, DynamoDB, Lambda, API Gateway, VPC, IAM, CloudFront, and CloudWatch.

JALA UNIVERSITY - FULLSTACK BOOTCAMP **Remote**
April 2026 - August 2026
Full time training on enterprise fullstack development with Angular and .NET/C#, ranked as one of the Top 3 performers of the cohort. Curriculum covered DDD, Clean/Hexagonal architecture, modular monoliths, asynchronous messaging and cloud deployment, applied end to end in the QuizArena MVP (see Projects).

QVERSITY DATA ENGINEER TRAINING **Cali, Colombia**
May 2025 - July 2025

Data engineering training: 2 months, core concepts of data engineering with Python and SQL on the Data Camp platform, plus the DataBricks Data Engineer Associate certification.

JAVA TRAINING "CODE YOUR FUTURE" BY GLOBANT UNIVERSITY **Remote**
August 2024 - April 2025

Java Backend Training: 8 months, based on peer learning and content developed by the EGG platform, part time, intensity 12 hours per week. Core concepts on programming, Java basics, OOP, Maven, JUnit. MySQL, JDBC, JPA, SPRING, API Rest.

HOLBERTON SCHOOL **Cali, Colombia**
June 2021 - March 2022

Software Development Training: 9 months, project based, independent and peer learning, full time, intensity 60 hours per week. Core work in C, Python, Javascript and Linux systems programming.

UNIVERSIDAD DEL VALLE **Cali, Colombia**
June 2016 – December 2021

Degree in Business Administration: 5 years, learning focused on communication development, teamwork, public speaking and leadership.

ADDITIONAL SKILLS

- Native in Spanish. Fluent in English (B2-C1), used daily in remote work with US-based teams and clients.
- Business Administration background: comfortable gathering requirements directly from non-technical stakeholders and translating them into technical solutions.
- Mentored 80+ students in programming, algorithms and software architecture.
